# THE GOLDEN ROD.

Devoted to the Mining and Development of the Windermere and Golden Divisions of the District of North East Kootenay.

Vol. II, No. 2.

Canterbury, B. C., Thursday, June 13, 1901.

\$2.00 Per Year.

## Ledge Croppings

### happenings of Interest Among The Treasure Vaults--General News of This District.

H. Hughes and S. Young started on a trip to Boulder creek Monday.

Travelling Farnham has taken up 600 acres of land on Iron Cap creek.

John Trever has returned from Copper creek where he located several claims.

H. Mathers and W. Dept. came down from Finlay creek last week and report that they have made a big gold report.

A spouse started up Sunday last week last week, to see some properties and there is still considerable snow on the hills. It is still too early to start up.

There will in all probability be a great number of prospectors come over the mountain from West Kootenay this summer to prospect, as coming over the mountain is considerably more time and money.

Misses Wallinger and Ellen drove from Fort Steele on Sunday, and are expected to be back in a few days.

Mr. Jones is leaving the Settling land and Mary claims from Messrs. Stockdale and Johnston.

Mr. Haywood, who has for many years captained steamers on Kootenay, has spent several days in Windermere.

Mr. Haywood is representing West Kootenay mining investors and will probably have capital here this summer.

Mr. McLean and partners are working on the Mineral King on Tolly creek and intend to do considerable work this season in order to show what they have.

The property has big surface, but is not yet developed. Over 7000 feet has been run on it.

Messrs. Hwa and Miller were the first to make the trip over the summit from West Kootenay this season, arriving last week. They report that there is still considerable snow on the summit.

These gentlemen spent the most of last summer prospecting and working their claims on Tolly creek and have now gone back to their homes again.

The McDonald mine, operating the Iron Cap on McDonald creek, are most anxious to have the Horse Thief wagon completed at an early date in order that they may complete the road up McDonald creek to the top of the mountain.

Mr. McDonald says that they will have the snow fall again, and as a further reason state that they want to install some heavy machinery this fall.

The Starbuck returned home from Fort Steele on Sunday and has since gone up to McDonald creek. He is accompanied by Chas. Emmer, of Kimberley, who will spend some time looking over the district.

In conversation with the Orange M. Belmont stated that as there was very little doing in South East Kootenay it was a most opportune time to visit this district. He is on the lookout for copper properties.

M. T. Fraction.

E. S. Gallup has returned from the Little North Fork of Tolly creek where he has been doing prospecting work on the M. T. Fraction mineral claim, which is a fact of the Delphine. He has returned the Delphine Delphine claim from 150 feet by open cuts and has a showing of 10 inches of silver here.

From which assays give returns ranging all the way from 200 to 600 ounces of silver. Should he not make a deal on the fraction at once he will shortly put a few men to work to develop it.

Harry Hughes returned last week from Spence where he spent the major portion of the past winter. While away he visited many camps in West Kootenay and states that wherever he went he found a great deal of favorable talk of the Windermere country.

He expressed in his opinion that there will be a big rush of prospecting and mining here this season. Mr. Hughes has been gone up Boulder creek to some extent on his claims and says the boys will see very little of him this summer as he believes now is the time to work and get his claims in shape, he expects to give up.

### Mineral Act Amendment

On the last day of July next the following amendment to the mineral act comes into force and it will be well for all free miners to remember it:

Section 4 of the "Mineral Act Amendment Act, 1900," is hereby repealed, and the following substituted therefor:

"4. In case any person should allow his free miner's certificate to expire he may, at any time within six months from the date of such expiration, obtain from the proper officer, upon the payment of a fee of fifteen dollars, a special free miner's certificate. Such special certificate shall have the effect of reviving the title of the person to whom it is issued to all mineral claims which such person owned at the time of the lapse of his former certificate, except such as are under the provisions of the Mineral Act and Amending Acts had become the property of some other person at or before the time of the issue of such special certificate, and shall also operate as a free miner's certificate until midnight of the thirty-first day of May next after its issue. In the case of a joint certificate the fee for such special certificate shall be three hundred dollars."

Some townsfolk now expect to build up their towns by means of the new mineral act and newspaper to mention their outcroppings.

Mr. Handly, assistant inspector of roads is now making an inspection of the various public works that are to be completed this season.

The townships that show the greatest enterprise this summer will win out. They should first of all purchase a liberal supply of water.

Should any ever again reduce the orange prices to a minimum, the reason is that there is a difference of 12 between you and the producer.

Jack Campbell will have on Monday for East Kootenay to open up his property there. He has interests in the Windermere--Boulder district.

The Windermere new school house is now being completed. It is a good frame building and will be a credit to the town. D. Dale has the contract.

Rev. J. G. Duncan leaves today for a tour of the valley. He will remain for two or three weeks, during which time his services are needed in the valley.

The weather for the past week has been exceptionally cold and a great deal of rain has fallen. High water is feared should a continued warm spell set in.

An important meeting was held at Windermere Saturday to talk over the advisability of holding the annual race meet. It was decided to hold a general one but it was decided to call a general one at an early date.

The first monthly report of the Atlantic public school shows that there were 17 pupils on the roll. This is considered very good for a new school. We will publish a monthly report on all the schools in the district, hereafter.

W. S. Sault went down to Golden on Friday's boat to have several car loads of freight, which are on route to his home in the north. He has also contracted for the freight, the balance will follow on the next boat.

There is every likelihood that a road will be built from Canterbury along the lake to Sunshine Canyon in the near future. This would be a great convenience to the ranches along this route and is necessary in order that those who have lately taken up land may not be left out.

Pete Larson has returned to the district after his various interests here. Since he left here last fall he has had a good time and visited many of the Windermere country in a day and a half. He will remain several days to have a look over the country. Being interested in the Orange pits with his many friends throughout this district in visiting Mr. Larson long life and much happiness.

E. A. Small, of the Comorithan Hotel, and A. Vulliamy drove in from Cranbrook yesterday, making the trip back in the boat. He has also contracted for the freight, the balance will follow on the next boat.

Mr. Jones will likely remain all summer to carry on the work now started any other company may take up.

Canada's Politicians.

Ottawa honors politicians who were here for the party. But it is a question as to the best of them were known to the public.

The election was the one achievement of the day which Canada was proud to have.

The hands of ex-convicted statesmen the country were little enough to get the best of them.

Small part in the rise and progress of Canada. The alleged genius of the Canadian politician was not seen to have been strongly gifted with foresight.

Canada is in a good position, but a country with such resources and such people ought to be in a good position. Canada owes her greatness to the loyalty of her people and to the genius of her statesmen, living or dead--Burrill, Thompson.

TELEGRAPH LINE KICK

Line Finished But Not Connected--Loss Caused

The telegraph line to Golden from Windermere is not yet in operation although the line has been completed for some time. There appears to be some hitch between the Government and the C. P. R. although the trouble may not have been made public.

Whether there is or not the line should not be in operation further than has been long of it in order to have these telegrams as it is now almost a year since the first money was appropriated for this line. It takes a year to get the telegraph line in operation, that need is not increased annually. This district is on the eve of a great upward and upward movement and in order to facilitate business the line of the wire is absolutely essential.

Example of the unnecessary expense incurred by people here and the expense of telegraphing this line and in place here to hear of it. We may not have an instance that occurred last week.

Mr. W. S. Sault, of the New York Richmond Mining Co. of New York had it necessary to telegraph and was obliged to go all the way to Golden, a distance of 50 miles to send his message, and in order to facilitate business the line of the wire is absolutely essential.

### Steamer North Star

The Upper Columbia Navigation & Trading Co. have decided to put the steamer North Star on the route from Golden to Windermere. Capt. Armstrong and Mate Jasper Leave are now completing arrangements to take a force of men up to Canal Flats where they will prepare to open the old canal. While the work is being done the two officers will go down Kootenay river to Jennings and count on bringing the steamer up easily in four days, when everything will be in readiness to bring her through the canal.

The North Star is a fine large steamer 165 feet over all, with a 25-foot beam, light she-draws only 19 inches of water and loaded with 150 tons draws about 28 inches. Hereabouts are large and elegant. She will make the trip to Golden in nine hours. The addition of this vessel to the company's fleet will put them in a position to handle large quantities of freight speedily and give an excellent passenger service.

lightening at this end has not yet been completed.

"Now will you be good. Dominion Government."

The best way for a man to get out of a lovely position is to be completely decisive in it. By John Hall.

"Cephalopods" and "Cory" them, the pretty little ones to carry them, but it is a mighty good idea, for the same, for him to be little "you" and send out a few invitations."

Paradise Mine To Start Work

The Paradise mine on Spring creek after a shut-down of several weeks is to start up again in a few days. Preparations have been made for several days and the Foreman H. B. Rieley will get tomorrow or the next day with a force of men to start work, and it is stated that by next Monday a good crew of men will be pushing work along.

This is good news as it goes to show that the better part of the coming mining season of the Province is still in the fact that the 1400 ton shipment has been such as encourages the owners to make further and, we hope, greater development and ore shipments than ever before.

Messrs. Bruce and Hammond, who have the property under loan, are said to have already acquired a controlling interest, and the third payment has recently been made.

The Pre-emptor's Chance.

The attention of the pre-emptors of Crown lands is called to the amendments to the Land Act passed at the last session.

"Pre-emptors of Crown land, whether in arrears in payment of the statements of purchase money or not, who at the time of coming into force of the Act have obtained certificates of pre-emption, or who shall have obtained certificates of pre-emption within twelve months of interest, shall on completion of the provisions of the Land Act," except as hereby altered, be entitled to obtain Crown grants of their pre-emption claims upon completing payments of purchase money at the rate of twenty-five cents per acre, and Crown grant fees, which payments may be made as follows:

"Twenty-five cents per acre on or before the 31st of December, 1901;

"Twenty-five cents per acre on or before the 30th day of June, 1902;

"Twenty-five cents per acre on or before the 31st day of December, 1902, and without any further payment of interest or arrears of interest."

Subject for The Vendor.

The Big Horse Ranch near Windermere was sold by auction in Golden on Monday.

The steamer City of Windermere is now making regular trips from Golden to Windermere.

Mr. H. Macdonald, of Peterborough, went down to Golden on a business trip Tuesday, returning again Tuesday.

J. J. Quinlan was fine \$200 and costs by R. J. Scott, S.M., last week for using abusive and insulting language to Mrs. T. Ryan at Windermere.

Johnny Buchanan, Charlie Anderson and Jim Lowden left last Saturday for the Windermere to open up their claims there--Sandra Eyre-Clark.

The terms are beginning to wear their suggestive appearance, as all the men are deserting them and making for the hills. This is the last indication of a busy mining season.

## THE OUTCROP.

Published Every Thursday in the heart of a Wonderfully Rich Mineral and Agricultural District.

Subscription, - - - \$2.00 A Year.

W. P. EVANS, Promoter of Publication, - - - Proprietor.

CANTERBURY, B.C., THURSDAY, JUNE 13, 1901.

There is a rumor afloat that a smelter will be erected in this division. If any company can be induced to build one it will prove a great boon to this country, and we are sure that every man here will do all he can to assist in bringing this about.

There is an ever-increasing demand for copper properties in the Windermere division and it is quite evident that the best claims will be taken up very shortly as already there are a half-dozen men seeking for them. It is, therefore, advisable for prospectors having copper properties to put them in good shape as soon as possible in order to dispose of them.

There is no disputing the fact that North East Kootenay is possessed of as many and varied natural resources as can be found in any other portion of this marvelously rich Province.

Yet, in the development of these resources there are features which strike even the most casual observer as not altogether right and to the person who considers them to any extent almost lamentable.

We refer in the first place to the lack of any settled system in the methods adopted for opening up and developing the resources so as to turn them to commercial value.

There are too many men working single-handed where united effort is needed to advance the interests of the district. Unity is necessary not only from a patriotic view, but from an individual and financial point.

It is a good thing for each man to single out certain capitalists and use his every influence to interest them in this district and to sell them property, so long as legitimate means are employed. The district owes much already to individual effort and we are pleased to note that today there is scarce a prospector in the whole district who is not expecting that their efforts will prevail and that this season minded men will come to purchase their property.

There is, however, a great lack of united effort that is so necessary to the upbuilding and maintaining of systematic progress. If with the individual effort there is a recognized united one it stimulates the effort and forces those with whom we have to deal at long range, to a great extent, to admit that their chances of making profitable investments are assured. Then when the world sees that there is united expression and work it is an easy matter to induce the right kind of men to come here to invest.

There is too much selfishness all over this old world and the people here are just the same as elsewhere. It is recognized by all the leading financiers that in unity alone there is strength and as an evidence we need only look to the reason of the formation of the various big trusts that have been organized. Seeing that they are successful it is not evident that we as a people working with the same end in view should become as one and so conform our efforts that they will have full weight and significance?

Of course it will be argued that should a mass meeting be called that there will be disagreements in attempting to organize any system. That is to be expected, but let us agree to disagree. If we did not express different opinions what is the use of meeting. There is too much pandering over disagreements. Out with what you have to say and if the other fellow disagrees let him his opinion. The Lord did not make us all alike and yet a man's a man for all of that. If anything the Outcrops says don't please you we invite you to say so and we will give you the space and not use you unfair.

There is another feature which is altogether too prominent and which reveals itself individually as well as collectively. That is the habit of "waiting for something to turn up" instead of "turning something up."

It is wait until we see what the government will do; wait until the estimates are down; until the road is built, till the trail is made, the bridge put in, the other fellow shows up his claim, or the expert arrives; wait until the weather is good, and in fact it is wait all the time. "All things come to him who waits," is good medicine if taken in proper doses, but it should occasionally be flavored with "good intentions."

Then there is a great lack in printers' ink. It should be brought in by the barrelful instead of 10-pound cans and when it is brought the Outcrops will large shipments should be made to every habitable part of the globe.

There are other things that attention should be given to in order to make this camp hum. But what is needed next this season is unity, plenty of hard work and the free

use of printers' ink to tell all about it. The one is just as essential as the other. The three combined will do more to lay deep and broad foundations for North East Kootenay than anything else.

If we can tell the world that the men of this district are all working together to further prove the existence of large rich ore bodies, it will do more to bring in capital than all the boasting and nice flowery strewn words that can be strung together by the most artful. And we can do this to a considerable extent, but what we want to impress upon the reader is the necessity of carrying out the principles in a broader sense.

The Most Complete Health Resort on the Continent of North America.  
Sited on the most beautiful scenery in the world.

Residing, Fishing, and Hunting. HALEYON HOT SPRINGS SANITARIUM. Resident Physician and Nurse.

## IF CHRIST SHOULD COME TODAY

I have come and the world shall be shaken  
Like a reed at the touch of my rod,  
And the kingdoms of time shall be broken  
Till the voice of the exanious of God  
No more thru the din of ages  
Shall warnings and chidings divine,  
From the lips of my people and sage  
Be trumpeted like peals of divine  
Ye have stolen my land and my cattle,  
Ye have kept back from labor its moil,  
Ye have challenged the contests in battle  
When they plead at your feet in their  
And when clangers of longer ages hinder  
And the multitudes prayed to be fed,  
Ye have answered with prisons or  
The cries of your landings for bread,  
From from your altars and churches,  
And the mackings of stripes and floggers,  
To join the long weary march  
Of the ones ye have robbed of their  
I will share the sorrow and crosses,  
Of the naked, the hungry and cold  
And dearest to me are their bones  
Then your gins and your traps and  
I will wither the might of the spoiler,  
I will laugh at your dangerous and looks,  
For trust shall yield to the collar,  
And your judges eat grass like an ox,  
For the prayers of the poor have ascended  
To be written in lightnings on high,  
And the walls of your captives have  
I denuded.  
With the idols that must leap from the  
sky,  
The thrones of your kings shall be shat-  
tered  
On the barbers of Blas Galilee,  
For I come not alone and a stranger—  
Let my rapers will sing like the night;  
Till the star that stood over the manger  
Shall cover the world with its light.  
—James G. Clark.

## THE WALL STREET PIT

I see a hell of faces surge and what  
Like madmen in the ocean—fear lean  
And fearless as the talons of a hawk—  
Hot lava like the faces of the wolves  
That track the traveler fleeing through  
the night.  
Grim faces sharpen up and fallen in,  
Deep pitted like weather-eaten bark of  
oak.  
Drawn faces like the faces of the dead,  
Grown suddenly old upon the brink of  
earth.

Is this a whirl of madmen raving,  
And showing teeth in their merriment?  
Is this a storm again with shrieking crew,  
To set the dust and drink the pairing  
wind?  
And all for what? A handful of bright  
sand  
To buy a shroud with and a length of  
earth.

Oh, sinner are the hearts so still ways,  
Thrice happier they who, far from these  
wild hours,  
Grow softly as the apples on a bough,  
Wiser the plowman with scudding birds,  
Turning a straight, fresh furrow down  
the field—  
Wiser the herdsman whistling to his  
herd.  
In the long shadows at the break of day;  
Wiser the fisherman with quiet bait,  
Slanting his sail against the evening  
wind.

The swallow sweeps back from the south  
again,  
The green of May is clinging all the boughs  
The sky serene waits in the town—  
This roar of giddy madness surging on  
Surrounded by the quiet of the hills  
With the great calm stars forever over-  
head,  
And, under all, the silence of the dead.  
Edwin Markham.

## WILD AND WOOLY WEST

It was midnight as a thundering knock  
came at the door of room No. 48, Phoenix  
Hotel.  
"What is wanted?" asked the occu-  
pant as he sat up in bed with furiously  
beating heart.

"We want you!" Open this door!"  
The man sprang out of bed and fur-  
iously dressed himself. His face was  
pale and his hands trembled, but he  
went to his door with a determination to sell  
his life dearly. He heard a heavy door  
opening in the hall, and presently a door  
was burst from its hinges and a dozen  
men burst into the room. They found  
him standing with a revolver in each  
hand and the light of battle in his eyes.  
"You may hang me," he said in a low  
voice, "but I will see that you will go  
into the other world before me."  
"Who said anything about hanging?"  
inquired a voice.

"But you have seen for that. Twelve  
years ago in this town I killed four men.  
You have no right to see and have come  
for revenge."  
"Not much, stranger. We don't know  
anything about the four men and don't  
want to. You live in Missouri, don't  
you?"

"I do."  
"Well, what we wanted to ask was  
whether there of a kind test a trail in  
your state."  
"They don't."  
"Then that's all, and you can go back  
to your home. Sorry to have the  
men but we had to get and wanted to  
settle it."

## Notice.

Notice is hereby given that I, Wm. A. Skelton, have handed over all my  
books and accounts to Mr. Hugh Mac-  
donald, of Peterborough, who will settle  
all accounts and to whom all monies due  
me are to be paid.

WM. A. SKELTON.

## NOTICE.

Notice is hereby given that one month  
after date I intend to make application  
to the Chief Commissioner of Lands and  
Works for permission to purchase eighty  
acres of Crown Lands for agricultural  
purposes, situated between Horse Trail  
and Number Two Creeks, in the District  
of North East Kootenay, about one mile  
from the Columbia River, namely  
commencing at a point placed at the north-  
east corner of Willie B. McLean's pre-emption  
marked "Chad A. Watt's north  
west corner," thence south forty chains,  
thence east twenty chains, thence north  
forty chains, thence west twenty chains  
to the point of commencement, contain-  
ing eighty acres.  
Dated at Peterborough, B. C.,  
May 13th, 1901.

CHARLES A. WATT.

## NOTICE.

Notice is hereby given that W. S.  
Santo has severed his connection with  
the firm of W. S. Santo & Company,  
carrying on a general store business in  
Peterborough, B. C., and further that  
the said business will no longer be  
known under the firm name of W. S.  
Santo & Company, and that the said  
business will hereafter be carried on  
under the name of "The Peterborough  
Trading Company."  
W. S. SANTO.  
Peterborough, B. C.,  
May 13th, 1901.

This Company now offers for sale their  
lands along the Columbia River and  
Lake in blocks of 100 acres and upwards.  
These lands have been carefully  
selected and comprise some of the best  
agricultural and grazing locations in the  
District. Prices from \$1.00 to \$5.00 per  
acre on easy terms, a cash payment of  
only \$120.00 on 100 acres at \$5.00 and  
nine subsequent annual payments of  
\$100.00 each, including interest.  
For maps and terms apply here.

R. R. BRUCE, Peterborough, B. C.  
F. T. GRIFFIN,  
Land Commissioner,  
Winnipeg, Man.  
NOTICE.

Parties cutting timber or wood on the  
lands of this Company without authority  
will be prosecuted.

THE OUTCROP will arrange for a good  
service of telegraphic news and have the  
papers delivered in Windermere, Athol-  
mer and Peterborough, provided another  
100 people become subscribers. Now  
show your enterprise.
